# OUR COMMITMENTS

FOR OUR BREAD AND PASTRY PRODUCTION SITES IN FRANCE

## FLOUR

- / 100% of our conventional flours used in our French production sites come from France, i.e. they are produced from French wheat<sup>1</sup> and processed by millers located less than 300 km from our production sites.
- / The organic wheat flours in the breads made on our French sites are also made with organic French wheat<sup>1</sup>.

## BUTTER

- / We are working on writing and signing our **Bridor Responsible Butter Charter** with our processing and livestock partners.
- / In some recipes, we use **PDO Charentes-Poitou butter** which is unanimously recognised by French artisan bakers.

## EGGS

- / Since 1 January 2019 the eggs used on our French sites for Bridor products are from barn hens. Some lines are made with free range eggs.

## BRIDOR CLEAN LABEL

Our Bridor Clean Label<sup>2</sup> recipes are made with:

- / ingredients of natural origin
- / ingredients with colouring, aromatic or texture-enhancing properties, such as vanilla flavouring or turmeric for the colour.

*Only ascorbic acid, which plays a decisive role in the final quality of the products, is tolerated in our Bridor Clean Label recipes. When it is used, it is always in a quantity of less than 0.02%.*

## SALT CONTENT OF OUR PRODUCTS

- / An ambitious commitment to reduce salt:  
Since 2024, the maximum salt content in our bread is 1.3 g/100 g<sup>3</sup>.
- / A low-salt product range: recipes made with 25% less salt compared to the average of similar products on the market.

Bridor Clean Label  
2026 GOAL

(1) With the exception of weather conditions making it impossible to supply 100% French origin wheat.  
(2) Bridor Clean Label scope: Bread, Viennese Pastries, Savoury snacking, Brioche under the Bridor brand, including trade product mix.  
(3) For products made in France. In the baked product, excluding Focaccias.

PROTECTING OUR ENVIRONMENT

## REDUCING CONSUMPTION

### Over 75,000 m<sup>3</sup>

of water per year has been saved on our French production sites since 2021 thanks to the use of adiabatic technology for our old and new freezing facilities. This technology brings warm, dry air into contact with a humid area, effectively reducing temperatures.

Cutting our water consumption by a third by using the best technology in the industry

#sharing

### 100% LED lighting

By the end of 2024, all of our French production sites will have LED lighting. This consumes less electricity and has a longer life span, which reduces waste.

### Reducing energy waste

The installation of a system for mapping our production facilities' consumption allows us to consume what we need and to avoid wasting energy.

### -40% gas consumption

for our hot water tanks thanks to recovering heat from the machine rooms to preheat domestic hot water.

### ENERGY MANAGEMENT CERTIFICATION

This certification promotes companies which are committed to reducing their impact on the climate, preserving resources and improving their results thanks to efficient energy management.

## BIODIVERSITY

Consideration of biodiversity is an integral part in the study of all our future projects. Thus, our Louverné site has eight beehives and its green spaces are maintained by sheep thanks to "Mouton de l'Ouest".

## ECO-ACTIONS

100% of our industrial waste water is used to irrigate fields close to our production sites.

In 2022, this represented 112,000 m<sup>3</sup> of water reused!

### 100% of our waste

is now recovered through recycling, animal feed or heating buildings.

Reducing our waste by removing 8600T of butter packaging

The removal of cardboard packaging represents 158 tonnes less waste!

**RESPECT FOR WOMEN AND MEN**

## HEALTH, SAFETY AND WELL-BEING

### COMPANY WITH THE HEALTH AND SAFETY AT WORK CERTIFICATE

This certification encourages companies to incorporate a health and safety at work management policy and to associate goals with it.

### COMPANY WITH THE "VITRINE INDUSTRIE DU FUTUR" LABEL.

This label rewards technological innovations focused on people in our production sites.

Thanks to the **HUMAN project**, employees can benefit from a **tailor-made sports programme** and a gym to help them in the prevention of the risk of injuries and MSD (musculoskeletal disorders).

In 2019, we integrated our first exoskeletons. Since then, we have added **muscular activity sensors** to quantify the benefits of exoskeletons.

## INTEGRATION, TRAINING AND DIVERSITY

**Offering our employees recognised, certified training**

**CAMPUS BRIDOR**

**CAMPUS BRIDOR**, our training programme leading to certification, was launched in 2023 to offer training courses in Bridor professions. The programme alternates between the Servon-sur-Vilaine and Louverné production sites and can lead to employment.

In 2021, we installed two chatbots on our production sites. The first to help employees solve problems on production lines, the second to respond 24/7 to Human Resources issues.

At Bridor, July is Sign Language month. **Awareness-raising workshops held by deaf employees are organised to teach Sign Language to the teams.** After these workshops, memo files are given to all employees so that they can continue to practise in the divisions.

**Use smart technology to help reduce fatigue and injury**

**Reducing risk of injury with access to personal training app**
